Art Unit: 1652

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claim 1-9 and 12-14, drawn to a protein obtained from M20 and M20-2 cells having cytotoxic activity, classified in class 530, subclass 350.
- II. Claim 10-11, drawn to a method of inhibition of inflammatory response by treatment with an effective amount of the protein of Group I classified in class 424, subclass 278.1.

The inventions are different for the following reasons:

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the product, which is a protein can be used with a materially different process such as production of specific antibodies.

Inventions I-II are distinct for the reason given above. Because of their recognized divergent subject matter and/or different classification, restriction for examination purposes as indicated is proper.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
